**\$AITX** Just a heads up, the Q has 'gone gold' (as I call things that are done) with all the relevant reviews/signatures/etc. I'm 99% certain it will file within the NT period. 99% because few things are 100%. Let's make it a great day!

## AITX ESPORTS TEAM COMPETES IN GENESIS

AITX eSports is thrilled to announce that they will be competing in the prestigious Genesis tournament series, one of the largest and most renowned Super Smash Bros. tournament series in the United States.

This is a major opportunity for the organization, not just in terms of competition, but also in terms of brand awareness. Genesis, which takes place in the San Francisco Bay Area, is considered to be one of the top Super Smash Bros. tournaments in the world, alongside EVO and The Big House.

The tournament receives extensive viewership with over 100k people tuning in to watch the matches during their livestream.

## CISA BUILDS AI-BASED CYBERSECURITY ANALYTICS SANDBOX

The CISA Advanced Analytics Platform for Machine Learning (CAP-M) will drive problem solving around cybersecurity that encompasses both on-premises and cloud environments. The facility will be used for continuous experimentation in a range of areas, including analyzing and correlating data to help organizations respond to the changing threat landscape

## People as a premium. From lofty vision to our current reality.

Robots have long been thought to be a threat to human jobs, with many people worried that they will take over a large number of employment opportunities. However, as Steve explains, this is not the case.

Humans are the "premium product" and robots will not be able to replace the unique skills and abilities that people bring to the workforce. There are many examples from different industries to demonstrate how robots have been used to increase productivity, but have not resulted in significant job loss.

For instance, at a company called Drake Trailers in Australia, the installation of a welding robot increased productivity by 60%, but the company also increased its staff from 70 to 170 over five years. Similarly, when Southwest Airlines implemented check-in kiosks at LAX, human workers were not laid off, but were instead reassigned to tasks that require a human touch.
