AITX HITS 300!

AITX has announced that its subsidiary, Robotic Assistance Devices, Inc. (RAD), has received over 300 unit orders as the end of the fiscal year approaches.

The increasing demand for RAD's products underscores the Company's exceptional ability to deliver innovative, quality, and customer-centric solutions that meet the needs of its discerning clients.

RAD's robust sales results and growing sales pipeline are a testament to the strength of their customer relationships and the quality of their solutions. RAD's President, Mark Folmer, stated that the Company is well-positioned to take on any challenge and continue delivering exceptional solutions a

TEA-MAKING ROBOT MIMICS REMOTE HUMAN

Utilizing 5G technology and haptic feedback, the robot is capable of imitating the real-time movements of a human counterpart. The company aims to apply this innovation to remote education, entertainment, and healthcare. The demo exemplified the natural and instinctive interaction between humans and robots.

AITX Increases Investment in Video Management System Development

Anthony Sabino-Staine has been appointed as the Product Manager for ROSS, bringing over a decade of experience in the security technology industry.

ROSS enables legacy IP security cameras to connect with the RAD ecosystem, running the same AI analytic capabilities as other RAD hardware solutions. RAD announced that ROSS will be offered at an introductory price of \$10 per channel per month, including all analytics, notification abilities, and cloud storage.

Businesses are experiencing dissatisfaction with their outdated security cameras and video management systems, and are exploring cost-effective alternatives. ROSS will provide RAD's proven AI-based security analytics to common security cameras and take its place as the inevitable, missing link. Anthony stated that ROSS is an exceptional video management system with an extraordinary market opportunity and he was honored to join the team.
