DEALER NETWORK RAD-ICALLY EXPANDING!

We are pleased to announce the expansion of our dealer network with the addition of five new authorized dealers across the United States, including Hawaii, taking the total number of dealers to 63.

Our strategic partnerships continue to bolster our reach and visibility, further consolidating our position as a global leader in AI-driven security and productivity solutions.

The upcoming appearance of our innovative product, RADD OG, on the television series "Stars on Mars," is generating notable anticipation, poised to strengthen our market position.

Moreover, our novel 'security-in-a-box' strategy, demonstrated via the ROSA security robot, continues to prove its efficiency and value.

"It's a very positive trend that RAD continues to attract new dealers ~ Mark Folmer

AI HOAX TRIGGERS TEMPORARY MARKET PANIC

An AI-generated image falsely depicting a disaster near the Pentagon triggered a temporary stock market drop, highlighting concerns about AI misuse. The image, quickly debunked as a fake, demonstrates the potential for AI to rapidly disseminate misinformation with severe consequences. This incident is a stark reminder of the need for strong regulation and public oversight of AI systems.

AI Revolution: RADD OG Fetches a Thousand Users in a Week!

We are excited to update on the progress of our first of three AI-powered language models, implemented to enhance investor engagement and ease of access to vital company information.

Within its first week of deployment on our website, RADD OG™, serving as a chat moderator, has seen an active user count exceeding 2,000, demonstrating a promising initial response.

The interactive tool continues to improve as more investors interact with the system, contributing to its evolving proficiency. This successful launch reaffirms our commitment to transparency and accessibility, underpinned by cutting-edge AI technology. We look forward to observing RADD OG™'s further refinement and the rollout of additional AI solutions like SPA and TTS.
