RIO-LIZING OUR POTENTIAL: AITX SCORES LANDMARK SECURITY TOWER DEAL

Exciting breakthroughs keep coming! AITX and RAD are thrilled to announce an impressive order of 38 RIO solar-powered security towers from a major shipping and transportation company.

Following a successful trial with nine units, the client has opted for an expanded deployment of 24 RIO 360 and 14 RIO 180 units across 10 distribution centers nationwide. This milestone deal is poised to add approximately \$60,000 to our Recurring Monthly Revenue (RMR), significantly elevating it from the current \$9,000.

Our CEO, Steve Reinharz, encapsulated the team's sentiment, stating this deal solidifies RAD's position as a premier enterprise security solution provider. This is just the initial phase; more expansion orders are on the horizon. It's a testament to our leading-edge technology and the hard work of our committed team.

“RAD's solutions are proving to be the go-to choice for companies seeking to elevate their security measures.” ~ David Pope

AR AND ROBOTICS REVOLUTIONIZE SPINAL SURGERY

In a groundbreaking surgery, Dr. Cezar Mizrahi at Shaare Zedek Medical Center in Jerusalem combined augmented reality (AR) with robotics to repair a complex spine fracture. The technology, provided by Medtronic, was used for the first time in a minimally invasive procedure.

The 25-year-old patient, who had fallen and severely fractured his back, was walking unassisted less than a day post-surgery. The AR-robotic synergy allowed for unprecedented precision, significantly minimizing risks. The successful procedure marks a new frontier in minimally invasive spine surgery.

Navigating the Future of Security: AITX's Position in a Comparative Market Analysis

The recent industry analysis by Jon Williams, contrasting Artificial Intelligence Technology Solutions (AITX) with Knightscope, provided valuable insights into the emerging landscape of the security robot market.

The report acknowledges both companies as key players, yet highlights AITX's substantial \$50 million investment in Research & Development as indicative of our commitment to innovation. Featuring cutting-edge products like ROSA and RADDOG AI, AITX's portfolio was noted for its advancements in autonomous security solutions. While Knightscope has made contributions to the field, the article suggests that AITX is particularly well-positioned to meet the evolving needs of the security industry.

This balanced evaluation serves to affirm our leadership role as we continue to focus on delivering technologically robust solutions that meet and exceed current security requirements.

Looking forward: Sales numbers expected to be revealed next week!
